

Nex Robotics Pvt Ltd. is a leading robotics design firm that develops world class robotic platforms. Our robot and UAV solutions are presently being used by ISRO, DRDO, BARC and IITs. Nex Robotics is the first adopter of Robot Operating System (ROS) enabled commercial platforms in India. A highly

educated, experienced and dynamic team of management with proven track record is responsible for handling this activity. Led by Dr. Anant Malewar, an IIT Bombay alumnus, the company is expanding its already diverse product line in emerging technologies such as artificial intelligence, remotely piloted vehicles and autonomous navigation. Mr. Sachitanand Malewar, an IIT Bombay research fellow, who has won more than 50 robotics competitions on national level and represented India as team leader in international contests such as Robocon, is a prolific robotics and UAV designer who is responsible for designing innovative solutions for complex problems. He has been instrumental in providing key solutions to many esteemed defense and research organizations.

Key focus on

-

Unmanned Ground Systems

-

Unmanned Aerial Systems

-

Intelligent Autonomous Transport Vehicles

-

Artificial Intelligence

-

Distributed computing

-

Multi agent systems

-

Mobile Robotics

-

1st Adopter of Robot Operating System (ROS) enabled commercial platforms in India
